Summary - Portfolio

U.S. Navy Veteran with 3 years of software engineer experience, proficient in programming languages such as Java, Python, and JavaScript. Strong problem-solving skills, communication, and ability to collaborate with others has aided in successful completion of an intensive 14-week coding bootcamp. I have enjoyed the challenges, leadership, and critical thinking involved adapting with a team to accomplish projects. Highly motivated and eager to contribute my skills to a dynamic software development team.

Technologies & Skills

Languages: JavaScript/TypeScript, Java, Python, HTML, CSS, SASS

Frameworks/Libraries: React/Native, Vue, Django, Flask, Express, Node, Bootstrap, SQLAlchemy, Marshmallow, PUG, Spring Boot, AWS Cloud

Database: MySQL, PostgreSQL, NOSQL, MongoDB

Professional Experience

Oneil Digital Solutions - Dallas TX

June 2021 – Feb 2023

A leading IT consulting firm specializing in optimization of complex end-to-end business process systems for multitude of business verticals including Financial, Digital Media, Healthcare, and Transportation industries.

Software Engineer I

- Maintained data structures for full stack implementations with OOP, Python, SQLAlchemy, & Marshmallow.
- Iterated front-end design for user experience to function with Flask, APIs, VueJS, & NodeJS.
- Worked along teammates to build optimal solutions to create multiple releases for company efficiency.
- Assisted in production support managing company and client's software to maintain servers.

Seattle Promotional Management – Seattle WA

Sept 2019 – Mar 2020

Campaign management Company that promotes client's business and products to broader markets.

Market Campaign Manager

- Managed multiple campaigns with partnered companies following different strategies to promote products.
- Launched successful initial campaigns building a relationship with new partners to ensure trust.
- Visited client retail operations analyzing diverse demographics in several states to promote products and broaden sales.

US NAVY – Yokosuka, Japan

Mar 2011 – Feb 2017

Naval force to empower and defend the United States of America

Culinary Specialist

- Utilized effective communication, organization, and leadership to train, mentor, and coordinate 100+ Food Service Assistants in a high paced environment.
- Established a 100% inventory status of 3 storerooms of approximately 250,000+ line items at sea and shore as Bulk Storeroom Manager maintaining proper stowage to ensure safety and sanitation.
- Preserved a cycle of supplies to ensure food recipes have necessary ingredients for future operations.

Deck Team

- Dismantled old decks, recycled material, and prepped surfaces for new installation.
- Operated various hand power tools and chemical mixtures for solid walking decks.
- Assisted in the training of new deck team members, ensuring a safe and efficient work environment.

Flight Team

- Responded in calls with team to coordinate cadence to ensure safe flight operations.
- Utilized, inspected, and stowed multiple flight equipment for future emergency operations.
- Prepared flight deck for safe landing for helicopter operations.

Lagging Team

- Installed fiber material for bulkhead insulation using precision cutting and measuring techniques.
- Managed, stowed, and disposed of hazardous materials according to strict safety regulations, ensuring compliance with safety standards
- Applied coating for interior design purposes, creating a clean and professional appearance.

Pulper

- Processed ship waste according to strict sanitary regulations, ensuring a clean and safe environment.
- Operated and maintained specialized equipment used in waste management, including compactors.
- Complied with all waste management procedures were followed accurately and efficiently, maintaining a high standard of cleanliness and safety on board the ship

Technical Projects

Firearm Profile - [Github](#)

Created for users to build their own basic firearm profile utilizing advance python techniques and VueJS

- Built to utilize **advance** python techniques with Flask, WSGI, Marshmallow, PostgreSQL, and APIs
- Using yarn, Pug, and VueJS Lifecycle to create a front-end to navigate through full stack application.

Latinos Auto Electric - [Github](#)

Designed for owner to easily communicate, set appointments, and inform users about company.

- Collaborated remotely and leveraged GitHub, Zoom, and Discord with client and team. Exploited agile methodology and daily standups to plan, coordinate, and deliver a functional MVC.
- Built end-to-end using Node.JS and React framework including leading collaborative discovery meetings with client, wireframing user journey, and creating a prototype that aligned with requirements and business needs.
- Developed a robust scalable SQL database utilizing Sequelize that saved user data and enabled users to schedule appointments thereby streamlining administrative processes.

Star Wars Profile - [Github](#)

- *Created to challenge developed skills front-end to back-end MERN stack.*
- Built application Utilizing MERN implementing Star Wars API using AXIOS to visually display Star Wars characters and stats.
- Leveraged Mongo database designing all models and RESTful APIs to store user Characters.
- Designed front-end with CSS, Material UI and third-party framer library for animated effects.

Education & Training

Seattle Central College, Associate of Business Administration - 2019

Coding Dojo, Web Developer Certification – 2021

National Academy of Sports Medicine, Personal Trainer Certificate -2018

Microsoft Office, LTD & KARS Institute: PowerPoint, Word, and Excel

Achievements

Fleet Letter of Commendation - Recognition by Fleet Admiral of 100% accountability of Inventory Management

Enlisted Surface Warfare Pin- Proof of basic knowledge of all shipboard operations
